This article has been retracted: please see Elsevier Policy on Article Withdrawal (<https://www.elsevier.com/about/our-business/policies/article-withdrawal>).

This article has been retracted at the request of the authors.

During follow-up analyses for a different manuscript, the authors recognized a serious error in their analysis pipeline that raises doubts about the results presented in this paper. Most likely, the results presented in the paper do not hold after fixing the error. The authors need some more time to fully understand the consequences of this error. Therefore, the paper is retracted at the request of authors.

The authors regret this and apologize to readers of Neurobiology of Aging.
